PROFESSIONAL SUMMARY

I am a software engineer with a background in IT and finance. I am very fascinated by the world of coding and the ability to build apps and websites. I am trained as a full stack developer. I am skilled in HTML and CSS Frameworks, JavaScript, React & Redux and Data Modeling. I also have experience manual Quality Assurance testing. I used JIRA, test rail for web and mobile testing, Android Studio, Xcode, ADB, UNIX and Browser stack. I have several project milestones, listed below.
