### PROFESSIONAL SUMMARY

I am a software engineer with a background in IT and finance. I am very fascinated by the world of coding and the ability to build apps and websites. I am trained as a full stack developer. I am skilled in HTML and CSS Frameworks, JavaScript, React & Redux and Data Modeling. Technical experience includes 2 years of manual testing and finding bugs to check software assurance products. Competent in all types of testing including functional, UI, smoke, and regression testing. Understanding of SDLC testing methodologies, processes, and documentation. Strong communication skills to interact with project team members, clients, and stakeholders as well as collaborate with the development team. I used JIRA, test rail for web and mobile testing, Android Studio, Xcode, ADB, UNIX and Browser stack. I have several project milestones, listed below.

---
